Benefits

SUBSTANTIAL COST SAVINGS

- Cut time to usable data
- Cut time to get people trained
- Cut time to workflow integration

MAXIMUM FLEXIBILITY

- Scalable software solutions
- Transparent licence models
- No hidden fees

INDIVIDUAL SERVICE

- Highly skilled engineering team
- Comprehensive integration support
- Customization for various individual requirements

TRUSTED TECHNOLOGY

- Built for heavy duty 24/7 operation
- Trusted by large broadcasters and major media production companies

Moving Data. Fast.

TIXEL
MOVING DATA. FAST.

TIXEL offers unique lightweight solutions for high performance data transfer. Easily get the most out of your IP network link – the Internet, private links, VPN, LAN, WAN, or via satellite.

TIXEL software is the key enabler for accelerating plain point-to-point transfers, cloud services as well as complex big data, B2B, and enterprise workflows.

Based on TIXEL's rock-solid acceleration engine, these products provide unmatched performance and reliability, full-speed encryption, industry standard interfaces, and much more.

MOVING DATA. FAST.

Features

MAXIMUM SPEED
- Maximum throughput at any distance, even beyond 10G
- Accelerated by TIXEL's high performance protocol stack

HIGH SECURITY
- Secured by proven standard AES
- State-of-the-art TLS
- Fast CPU-efficient encryption

ROCK SOLID
- Maximum resilience
- Automatic transfer recovery
- HA cluster option

EASY INTEGRATION
- Lightweight REST API
- Perfect for multivendor setups
- Firewall friendly
- Easy deployment

READY TO GO
- Clear intuitive user interface
- Designed for ad hoc use
- Web based administration

TIXstream MFT

Direct full speed disk-to-disk transfer

Job control at both end points

NETWORK

Standard REST API

Controlled by 3rd party CMS, batch job, or via web browser

CORPORATE FILE TRANSFER

MFT

- Maximum file transfer performance independent of content and size
- Process driven internal and external asset exchange
- Decentralized job and queue management at both end points
- Perfectly fits in heterogeneous multi-vendor environments
- Enterprise features: check-sums, watch folders, resume, central management and more
- Secure single- and multi-destination file transfers
- On-the-fly lossless raw image compression option

TIXstream FX

Bidirectional file exchange

INTERNET

Browser only fallback

TIXstream FX server

TIXstream Express client

Direct relay transfers with combined MFT and FX

INTERNET FILE EXCHANGE

FX

- Easy-to-use fast file transfer for everyone
- Web based file exchange under your control
- Runs on-premise or at your preferred cloud data center
- Acceleration and transfer recovery with TIXstream Express Client plus browser-only access
- Easily customizable, including meta-data handling
- Minimum integration effort: operates stand alone as well as with MFT or embedded in your web application
